

Critical Thinking & Decision Making

Price
\$1,150.00

Duration
2 Days

Delivery Methods
VILT, Private Group

Evaluating information, making decisions and problem solving happens continually. On average we make as many as 50 decisions before we start work every day. Despite all the natural decision making that goes on and the problem solving we do, some people are very uncomfortable with having to make decisions. The answer rests in our ability to identify options, research, take time to define critical thinking means and learn these skills. The ability to clearly reason through problems and to present arguments in a logical, compelling way has become a key skill for survival as a leader. Using these processes to lead can take the anxiety out of problem solving and make decisions.

Who Should Attend

Individual Contributors, Supervisors, Managers, Directors
