CMMC Kickstart: A Practical Guide to Getting Ready for CMMC

Price	Duration	Delivery Methods
$695.00	1 Day	VILT, Private Group

The Cybersecurity Maturity Model Certification (CMMC), managed by the CMMC Accreditation Body (CMMC-AB), is a Department of Defense (DoD) program through which an organization's cybersecurity program is measured by their initial and ongoing compliance with applicable cybersecurity practices, as well as their integration of corresponding policies and plans into their overall business operations. By Fiscal Year 2026, all organizations providing products or services to the U.S. DoD must obtain at least a Maturity Level 1 certification under this program. This course will help you and your organization understand and plan for the impact of CMMC.

This class is not using CMMC Authorized Training Material and does not map to a CMMC certification

Who Should Attend

This course provides an introductory overview of the CMMC program for organizational decision makers. Business and IT leaders and IT staff might consider taking this course to learn about the CMMC Model to get a sense of what's required for a successful assessment, and the various ways they can start preparing.

Course Objectives

- Identify the crucial elements that are driving the CMMC initiative.
- Describe the architecture of the CMMC Model and the rationale behind it.
- Use the Assessment Guides to prepare your organization for a successful CMMC Assessment.
- Identify the roles and responsibilities in the CMMC ecosystem and during an Assessment.
