

Dell - PowerProtect Data Manager Implementation and Administration

Price
\$5,500.00

Duration
5 Days

Delivery Methods
VILT, Private Group

This course explains and demonstrates the deployment, configuration, and integration of Dell EMC PowerProtect Data Manager with Microsoft Exchange, Microsoft SQL, Kubernetes, Oracle, SAP HANA, and VMware virtual machines. It describes various databases backup and restore operations with PowerProtect Data Manager. This course includes labs to reinforce these skills through exercises.

Who Should Attend

This course is intended for customers, partners, and Dell EMC field support, deploy and remote support.

This class is not currently scheduled.
