ASP.NET 5 Overview

Wednesday, November 12, 2014

ASP.NET 5 is a significant redesign of ASP.NET. This topic introduces the new concepts in ASP.NET 5 and explains how they help you develop modern web apps.

Manage Client-Side Web Development in Visual Studio 2015, Using Grunt and Bower

Wednesday, November 12, 2014

ASP.NET 5.0 brings some big changes to the project system and build process for ASP.NET apps. In modern web app development, there are lots of moving parts: Server-side code (such as ASP.NET), client-side code (such as jQuery), and build tools (such as Grunt and Bower).
