

S COMMUNITY EDITION — FREE • .NET FRAMEWORK • .NET CORE • .NET 5-10

Free HTML to PDF for .NET.

The Community Edition that ships in production.

SelectPdf Community Edition is the free HTML to PDF converter for .NET — the same engine as our commercial library, with full HTML5/CSS3, a real JavaScript runtime and custom headers and footers — capped at five PDF pages per document. Free for any use, including production. It is a free product, not the commercial trial. On Linux, macOS and Docker, the free SelectPdf.HtmlToPdf.Universal package is the same Community Edition, with the same 5-page cap, rendered with Chromium.

S WHAT YOU GET

The free HTML to PDF converter for .NET, *in six bullets.*

- ✓ Convert any URL or HTML file to PDF
- ✓ No external dependencies
- ✓ HTML5 / CSS3 support
- ✓ Convert raw HTML strings to PDF
- ✓ Powerful JavaScript engine
- ✓ Customizable headers and footers

S VERY EASY TO USE

Four lines of C#. *One PDF.*

Instantiate the converter, call `ConvertUrl`, save the result, close the document. The Community Edition exposes the same surface as the commercial library — porting later is a no-op. Install `Select.HtmlToPdf` on Windows, or `SelectPdf.HtmlToPdf.Universal` on Windows, Linux, macOS and Docker with `using SelectPdf.Universal;`.

HtmlToPdf · C#

HtmlToPdf · VB.NET

HtmlToPdf.cs COPY

```
1 // instantiate the html to pdf converter
2 HtmlToPdf converter = new HtmlToPdf();
3
4 // convert the url to pdf
5 PdfDocument doc = converter.ConvertUrl(url);
6
7 // save pdf document
8 doc.Save(file);
9
10 // close pdf document
11 doc.Close();
```

§ NEEDS THE COMMERCIAL LIBRARY

What's *not in the free edition.*

The Community Edition is a free product with limited functionality — it is not the commercial trial. These features require the full [SelectPdf Library for .NET](#) (which has its own free, watermarked trial).

SCALE & TARGETING

- ✗ Create PDF documents with more than 5 pages
- ✗ Convert only a section of the page by HTML element ID
- ✗ Manually start the conversion from JavaScript
- ✗ Run a JS startup script before conversion
- ✗ Hide parts of the web page during conversion
- ✗ Custom headers and footers on specific pages

WORK WITH PDFS

- ✗ Load and modify existing PDF documents
- ✗ Add HTML, text, images to a PDF (PdfHtmlElement / PdfTextElement / PdfImageElement)
- ✗ Resize/scale content of existing PDFs
- ✗ PDF portfolios management
- ✗ Form-field filling
- ✗ Accessible / tagged PDF — PDF/UA-1 and PDF/UA-2
- ✗ PDF/A at the accessible A levels (1a, 2a, 3a), and PDF/A-3 in the classic Select.HtmlToPdf
- ✗ ZUGFeRD / Factur-X electronic invoices
- ✗ Word to PDF, tables of contents, fillable forms from HTML, redaction and signature validation — in the commercial SelectPdf.Universal package
- ✗ Specify the open action (jump to page, run script)

EXTRACT & CONVERT

- ✗ Extract text from PDF (PDF to Text converter)
- ✗ Search for text in a PDF
- ✗ Convert PDF pages to images (PDF to Image converter)
- ✗ Get web-elements location in the PDF

Where it *runs*.

.NET Framework and .NET Core through to .NET 10, on Windows, including Azure Web Apps, and on Linux, macOS and Docker with SelectPdf.HtmlToPdf.Universal.

FRAMEWORKS	.NET Framework 2.0+ / 4.0+, .NET Core, and .NET 5 through .NET 10 · .NET 8 / 10 and .NET Standard 2.0 (Universal)
